

Curtain Linings Size Guide

Our ready made pencil pleat and eyelet lining kits are intentionally manufactured 3-4" shorter than your main curtains. This means that when they are hung at the reverse of your main curtains, the top of the lining hangs 2-3" below the top of the main curtain and the base hem sits approx. 1" above the main curtain base hem. This is to ensure the lining remains hidden and does not hang below the bottom of your curtains.

Please see the sizing guide below to help you decide which lining size you need for your size curtains.
